

Endress+Hauser in the finals of the German Sustainability Award

Independent foundation honors pioneers for ecological and social commitment in 100 sectors

The German Sustainability Award (GSA) is recognized as Europe's largest award for ecological and social commitment. Every year since 2008, the independent German Sustainability Award Foundation has honored players from business, science and the public sector for their contributions to sustainable transformation. An expert jury nominated Endress+Hauser in the measurement and control technology sector. Now the top three in this category have been chosen and Endress+Hauser is one of the finalists.

Partner for sustainable transformation

As a family-owned company, Endress+Hauser wants to contribute to a sustainable world. Last year, the Group joined the Science Based Targets initiative with the aim of reducing its own carbon footprint to net zero by 2050. At the same time, Endress+Hauser sees itself as a partner for the sustainable transformation of the process industry. Its measurement technology products, solutions and services help customers in the process industry to increase their energy and resource efficiency and achieve climate and environmental protection targets.

Transparent processes and objective criteria

The GSA aims to promote the sustainable development of important aspects of society. The award is based on demanding assessments. Transparent processes and objective criteria allow the nominated companies and organizations to further improve their sustainability performance. The GSA is presented as part of the German Sustainability Day, one of the leading initiatives of its kind. This year's winners will be announced there on 28 November 2024.

Process instrumentation plays a pivotal role in energy and resource efficiency, as well as in protecting the climate and environment.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of more than 3.7 billion euros in 2023 with a total workforce of almost 17,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in more than 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,900 patents and applications protect the Group's intellectual property.
