

Virtual Instructor-Led Training

A remote and virtual training solution to support you when you need it the most

Benefits

- Reduced cost of learning resulting from no travel costs
- Easier access to learning for more employees
- Break up the sessions over multiple shorter segments, versus two or three days of continuous attendance
- Customize your virtual training on the technologies that are in your plant
- More efficient learning time due to less travel

As industry continues to utilize manufacturers' remote services for support through the COVID-19 crisis, many are considering this to be a new normal way of operation. Utilizing remote services has become a good alternative to on-site visits and has generated cost savings. Endress+Hauser has expanded its training capabilities to include virtual trainings from the PTU® (Process Training Unit) to support customers in the most convenient and efficient way.

How to get started

1. Click the button below.
2. Fill out the Customized Training Needs Analysis form as completely as possible.
3. Submit the form.

We will respond to you within two working days.
